

RESIDENTIAL STREET LIGHTING

I. AVAILABILITY

Service under this schedule is available to customers receiving service under Rate Schedule #9, Street Lighting, who reside in subdivisions outside incorporated municipalities.

II. APPLICATION

This schedule is applicable to all residents of a subdivision for service furnished for the operation of a residential street lighting system. Subdivisions must have a minimum of four customers per streetlight. All provisions of Rate Schedule #9, Street Lighting, shall apply except as specified herein.

III. GENERAL PROVISIONS

Company will supply service from its overhead distribution system to 175-watt, 7,000 lumen mercury vapor lamps or equivalent lighting in open bottom luminaires mounted on wooden poles. All fixtures shall be installed and maintained by the Company including lamp renewals. Lamps will normally burn every night from dusk to dawn.

IV. NET MONTHLY

The Net Monthly Bill shall be \$2.15 per month computed under Rate Schedule #9, Street Lighting, for service furnished during the current month, plus the Power Cost Adjustment applicable to the energy furnished for lighting service as determined under Power Cost Adjustment Clause PCA-WST.

V. SPECIAL FACILITIES

The additional charge set forth above will apply in subdivisions where street lights are mounted on metal standards and/or where the lighting system is supplied from underground distribution facilities, provided the company has received a contribution from the developer or others covering the increased cost of such facilities over those described under the General Provisions article of this rider.

VI. SERVICE PERIOD

Not less than one year. However, when a municipality or governmental agency contracts to pay for service furnished hereunder in accordance with standard street lighting rates, service under this rider schedule will be terminated.
